

► 企业简介 Introduction

苏州亚科科技股份有限公司成立于 2003 年，经多年的创新和发展，现已形成以“体外诊断试剂原料”、“电化新材料”、“生物缓冲剂”、“医药中间体”等为主导的，集研发、生产、销售和服务于一体的国家高新技术企业。亚科科技坚持自主品牌运营，旗下拥有著名品牌 YACOO。并拥有独立的研发试验中心和占地 100000 m² 的生产基地，并已通过 ISO9001:2015 质量体系认证，可为客户提供优质的克级至吨级的产品委托定制业务和批量化生产服务。

亚科科技总部运营中心座落在苏州，工厂位于山东济宁新材料产业园区。通过多年努力，已建成完善的营销体系，并以此辐射海外市场，远销至东南亚、欧美等多个国家和地区，得到全球客户的认可和信赖。

Suzhou Yacoo Science Co., LTD was founded in 2003. Via the innovation and development of more than 10 years, it has been a national high-tech enterprise specializing in "IVD Reagents Raw Materials", "New Electronic and Chemical Materials", "Biobuffers" and "Pharmaceutical Intermediates". Yacoo is a company with research, production, distribution and service as a whole, and owns its famous brand Yacoo. We have an independent research and development center and 10,0000 m² manufacture base, which have passed ISO9001:2015 quality system certification. Custom synthesis service and production in bulk can be offered.

Besides the R&D center and the marketing team in Suzhou, Yacoo also has a factory in Shandong Jining New Material Industrial Park. At present, Yacoo has formed an excellent marketing network which products are exported to Southeast Asian, Europe, America etc.. We have won the recognition and trust of global customers.

企业愿景 Corporation Vision

成为全球领先的医化材料定制服务者

To be the world's leading manufacturer of medical and chemical material customization

企业口号 Corporation Slogan

让“Yacoo”享誉全球医化材料界

Wish to enjoy high reputation in the field of medical and chemical material field over the world

企业使命 Corporation Mission

不断推动医化材料的技术改进和革新

To continuously promote the technological improvement and innovation of medical and chemical material

企业核心价值观 Enterprise Core Values

诚信感恩、责任敬勤、务实拼搏、创新卓越

Integrity and Appreciation, Obligation and Diligence, Practicability and fighting, Innovation and Excellence

公司成立历史

Development history

企业获得江苏省工业科技支撑及国家创新基金项目各 1 项，同年入选江苏省拟上市企业重点培育企业。
Two projects from Jiangsu Industrial Technology Support and the National Innovation Fund were approved. Yacoo was selected as key enterprise for Jiangsu Pre-IPO enterprises.

总部迁入苏州工业园区金海路 17 号，荣获“国家高新技术企业”。
The headquarters moved into No. 17, JinHai Rd. To be entitled National high-tech enterprise.

完成首轮股权融资；荣获“江苏省民营科技企业”称号，获得“江苏省高新技术产品认定证书”。
Completed the first round of equity financing; To be entitled Jiangsu private-owned science and technology enterprise, Obtained high-tech product certification in Jiangsu province.

成为苏州园区生物纳米产业园金融创新试点企业并完成了股份制改革。
To be BioBay's financial innovation pilot enterprise and completed shareholding-system reform

总部入驻国家级生物纳米科技产业园。
The headquarters moved into BioBay.

5 月成立亚科化学试剂股份有限公司。
The company was founded in May 2003.

制造能力 Manufacturing Capacity

>> 亚科产能 Capacity

亚科生产基地位于山东济宁市，拥有150台反应釜，反应总容量可达560000升。可年产TRIS 2000吨，MOPS 500吨，HEPES 500吨，EDOT 80吨。

The production base is located in Jining, Shandong Province. It owns 150 reaction caldrons which the total reaction capacity can reach 560,000 liters. The annual capacity of TRIS, MOPS, HEPES, and EDOT is 2000 tons, 500 tons, 500 tons and 80 tons respectively.

>> 技术服务 Technical Service

克级，公斤级到吨位级产品的定制合成、委托研发和来料加工服务。
Provide Custom synthesis, consigned research & development and processing for products from gram to tonnage.

产品的中试放大，技术转移和产业化生产。
Pilot magnification, technology transfer and industrialized production of products.

>> 擅长反应 Main Reactions

取代反应, substitution reaction	聚合反应, polymerization reaction
重氮反应, diazo reaction	氢化反应, hydrogenation reaction
氟化反应, fluorination reaction	烷基化反应, alkylation reaction

EHS管理 EHS Management

>> EHS方针 EHS Policy

>> EHS管理 EHS Management

公司严格遵守国家和地方有关环境保护的相关法律法规以及其他有关规定。
Yacoo strictly complies with the relevant national and local laws and regulations on environmental protection and other relevant provisions.

具有完善的三废处理设施，且工厂通过ISO14001:2015环境管理体系认证，能够在保证对环境友好的前提下安全开展生产活动。
With the perfect facilities for three-waste treatment, the factory has passed the ISO14001:2015 environmental management system certification, and could carry out the producing activity on the environment-friendly premise.

>> 品质管理 Quality Management

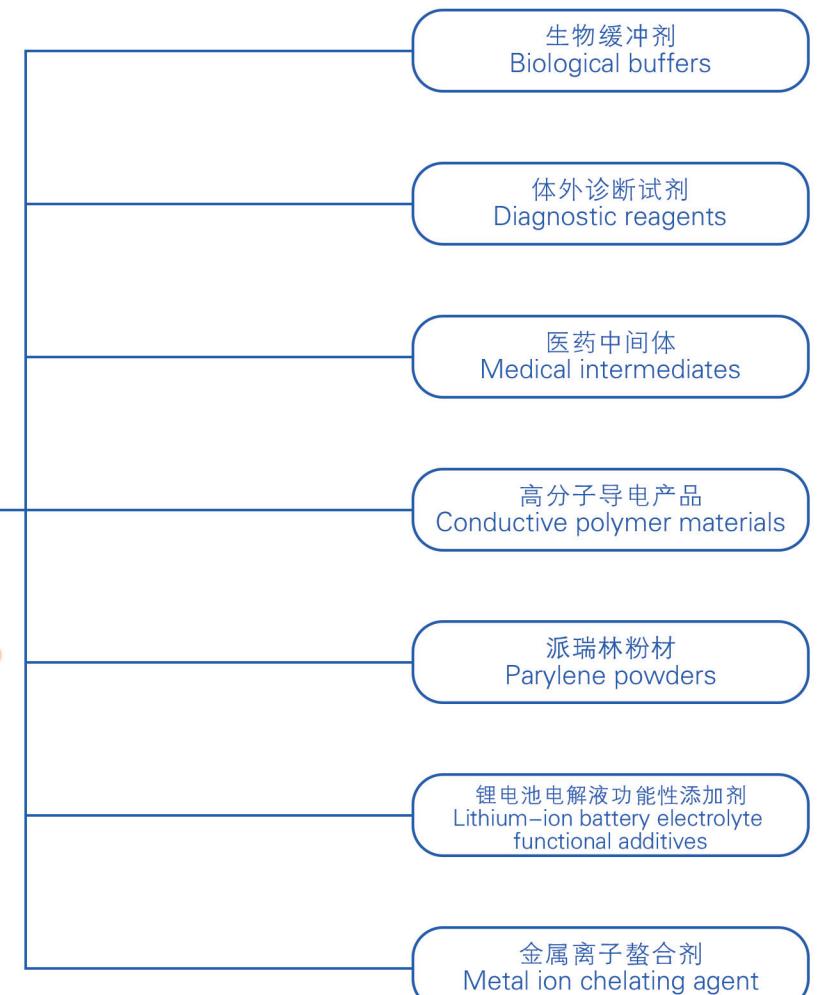

以过程控制保证产品质量；专注于为客户提供更高性价比的多样化产品和更优质的服务，以服务客户创新为己任。

Ensure the product quality by process control; concentrate on providing customers with diversified products with higher cost performance and services in better quality. Our mission is to serve the customers better and sustained innovation.

▶ 生物缓冲剂 Biological buffer

>> 明星产品 The Core Product

品名 Product Name	三(羟甲基)氨基甲烷 Tris
CAS	77-86-1
含量 Assay	≥99.5%
外观 Appearance	白色结晶粉末 White crystalline powder

> 产品简介 Introduction

Tris 是一种重要的生物缓冲剂，25° C 下的 pKa 为 8.06，pH 缓冲范围：7.0–9.0，广泛应用于生物化学、分子生物学等领域中缓冲液的制备。此外，Tris 还可用于化妆品、涂料以及体外诊断试剂的制备。

Tris is an important biological buffer with a pKa of 8.06 at 25°C and a pH buffer range of 7.0–9.0. It is widely used in the preparation of buffers in biochemistry, molecular biology etc . In addition, Tris can also be used in the preparation of cosmetics, coatings and in vitro diagnostic reagents.

▶ 医药中间体 Pharmaceutical intermediate

>> 明星产品 The Core Product

品名 Product Name	氨丁三醇 Trometamol
CAS	77-86-1
含量 Assay	≥99.5%
外观 Appearance	白色结晶粉末 White crystalline powder

> 产品简介 Introduction

氨丁三醇是一种重要的医药中间体，可用来合成右酮洛芬氨丁三醇、磷霉素氨丁三醇、酮咯酸氨丁三醇等药物。氨丁三醇作为药用辅料可用于碘海醇注射液、硫辛酸注射液、匹多莫德口服液等制剂。

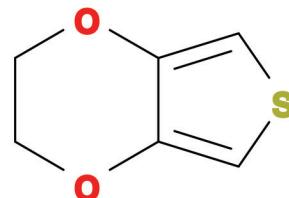

Trometamol is an important pharmaceutical intermediate that can be used to synthesize dexketoprofen tromethamine, fosfomycin tromethamine and ketorolac tromethamine etc. Trometamol is used as pharmaceutical excipient for iohexol injection, lipoic acid injection, and pidotimod oral solution etc.

>> 其他产品 Other Products

品名 Product Name	3,4- 乙烯二氧噻吩 EDOT
CAS	126213-50-1
含量 Assay	≥99.5%
外观 Appearance	无色至淡黄色液体 Colorless or light yellow liquid
水分 moisture	≤0.5%

> 产品简介 Introduction

EDOT 是性能稳定的导电聚合物单体，主要用于合成导电聚合物 PEDOT，其广泛应用于固态电容器、OLED 显示器、太阳能电池、防静电涂层、高导电涂层、印刷线路板、厚膜电致发光、有机薄膜晶体管等现代电子工业。

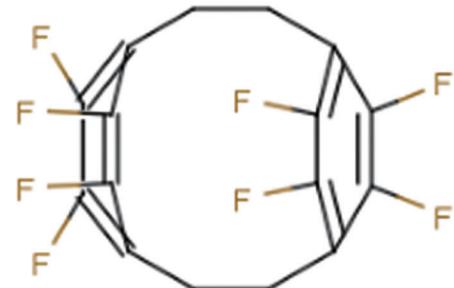

EDOT is a stable conductive polymer monomer, mainly used in the synthesis of conductive polymer PEDOT, which is widely used in solid capacitors, OLED displays, solar cells, anti-static coating, high conductive coating, printed circuit boards, thick film luminous, organic thin film transistor and other modern electronics industry.

派瑞林 N 粉 Parylene N dimer	1633-22-3	≥99%
派瑞林 C 粉 Parylene C dimer	28804-46-8	≥99.5%

> 产品简介 Introduction

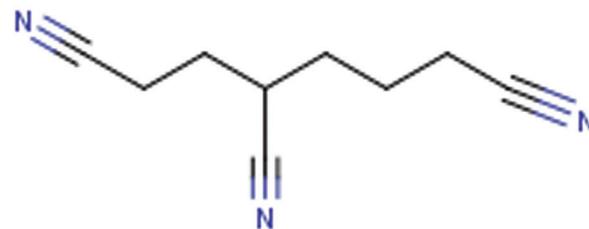

派瑞林材料是用独特的真空气相沉积工艺制备，由活性小分子在基材表面“生长”出完全敷形的聚合物薄膜涂层，具有防水、防潮、防霉、防腐、防盐雾及耐高温等功能。

Parylene coating is a kind of unique thin polymer film grows through the active small molecule on the surface of the substrate with vacuum vapor deposition process. It has the functions of waterproof, moistureproof, mildewproof, anti-corrosion, anti-salt spray, high temperature resistance, and so on.

锂电池电解液功能性添加剂

► Functional Additives for Lithium-ion Battery Electrolyte

>> 明星产品 The Core Product

品名 Product Name	1,3,6- 己烷三腈 (HTCN) 1,3,6-hexanetricarbonitrile
CAS	1772-25-4
含量 Assay	≥99%
外观 Appearance	无色至淡黄色液体 Colorless to light yellow liquid
水分 Moisture	≤100ppm
色度 Chromaticity	≤200APHA
色度 (25% DMC 溶液) Chromaticity(25% DMC solution)	≤60APHA

> 产品简介 Introduction

己烷三腈在性能方面更优于其他腈类添加剂 (己二腈, 丁二腈等)。在高电压电解液当中具有较好的高温储存和循环性能。

苏州亚科科技开创新工艺, 完成了对高纯度己烷三腈的研发生产, 并获得国家发明专利授权 (CN104387291B)。

1,3,6-hexanetricarbonitrile is better in the performance than other additives with cyano group (adiponitrile, succinonitrile etc.). It has good high-temperature storage and re-cycling performance in the high-voltage electrolyte.

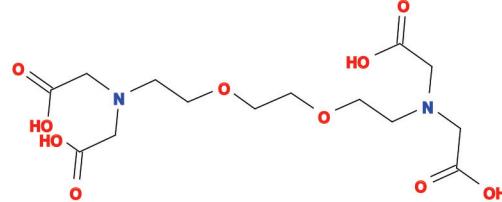

Suzhou Yacoo completed the research and development of high purity 1,3,6-hexanetricarbonitrile by a new synthesis technology, and obtained the national invention patent authorization (CN104387291B).

▶ 金属离子螯合剂 Metal ion chelating agent.

>> 明星产品 The Core Product

品名 Product Name	乙二醇双(2-氨基乙基醚)四乙酸 EGTA
CAS	67-42-5
含量 Assay	99.0% ~ 101.0%
外观 Appearance	白色粉末 White crystalline powder

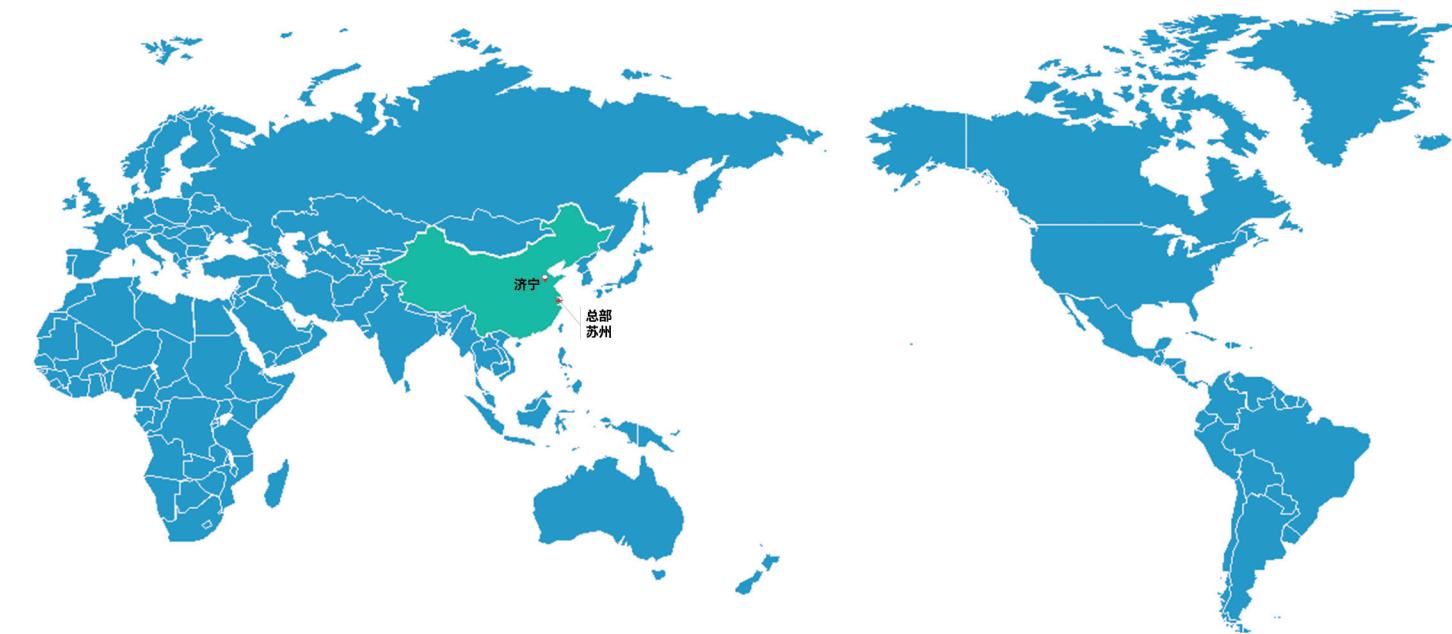

> 产品简介 Introduction

EGTA 是一种氨基多羧酸螯合剂，其与钙离子形成的螯合物稳定性高于与镁离子形成的螯合物，在 Mg^{2+} 离子存在下测定 Ca^{2+} 离子时，选用 EGTA 作滴定剂有利于提高选择性。EGTA 还可作为 ELISA 实验中碱性磷酸酶的抑制剂，印刷线路板的 OSP 处理液的组分。

EGTA is an aminopolycarboxylic acid type chelating agent. The calcium complex with EGTA is more stable than the magnesium complex with EGTA. EGTA is used as titrant to improve selectivity in determination of calcium in the presence of magnesium. EGTA is also useful in ELISA reaction as an inhibitor of alkaline phosphate activity. EGTA has also been as a component of the OSP processing solution for printed circuit board.
